

Don Aitken Centre - CCTV Installation

Client:	Main Roads WA
Location:	Don Aitken Centre – East Perth
Start Date:	June 2016
End Date:	June 2016
Contract:	Installation
Category:	CCTV Surveillance
Industry:	Government

TASC Digital Control Systems (WA) was successful in a tender to install an IP CCTV System to the Don Aitken Centre, Main Roads WA Head office in East Perth.

The project scope included 21 building mounted cameras with an option for 2 additional pole mounted cameras and utilising a DVTel head end. The overall objective was to provide a 360 external view of the property and car parks and the latest technology 4k cameras were chosen to help achieve this objective.

A critical requirement of the contract award was the certainty of delivery that the tight program of works (4 weeks from site possession) could be maintained. This also came with the added challenge of noisy, disruptive and civil works having to be completed out of hours due to the clients already busy work environment.

TASC was able to successfully deliver under the tight deadline through meticulous planning and a wholly collaborative effort between the TASC team, suppliers, consultant and the client. The execution of the works was undertaken as efficiently as possible, whilst maintaining the highest level of safety and quality standards.

Daily pre start meetings were essential to plan each days work as well as discuss any safety issues and mitigate any hazards that may have impacted the day-to-day operations of the site team during the installation of the system.

Feedback from all parties was extremely positive – particularly the quality of the installation and documentation provided for the project.
